

**GALWAY METALS INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS
FOR THE THREE AND NINE MONTHS ENDED
SEPTEMBER 30, 2014**

Introduction

The following management's discussion and analysis ("MD&A") of the financial condition and results of operations of Galway Metals Inc. ("Galway", "Galway Metals" or the "Company") constitutes management's review of the factors that affected the Company's financial and operating performance for the three and nine months ended September 30, 2014. This MD&A has been prepared in compliance with the requirements of National Instrument 51-102 – Continuous Disclosure Obligations. This discussion should be read in conjunction with the audited annual consolidated financial statements of the Company for the year ended December 31, 2013 as well as the unaudited interim consolidated financial statements for the three and nine months ended September 30, 2014, together with the notes thereto. Results are reported in United States dollars, unless otherwise noted. Information contained herein is presented as at November 26, 2014, unless otherwise indicated.

For the purposes of preparing this MD&A, management, in conjunction with the Board of Directors, considers the materiality of information. Information is considered material if: (i) such information results in, or would reasonably be expected to result in, a significant change in the market price or value of Galway common shares; or (ii) there is a substantial likelihood that a reasonable investor would consider it important in making an investment decision; or (iii) if it would significantly alter the total mix of information available to investors. Management, in conjunction with the Board of Directors, evaluates materiality with reference to all relevant circumstances, including potential market sensitivity.

Description of Business

Galway's goal is to deliver superior returns to shareholders by concentrating on the acquisition of properties that have the potential to contain economically recoverable precious and/or base metals reserves.

Galway Metals Inc. was incorporated pursuant to the Business Corporations Act (New Brunswick) on May 9, 2012. Galway Metals' head office is located at 36 Toronto Street, Suite 1000, Toronto, Ontario, Canada, M5C 2C5. Galway Metals was incorporated for the sole purpose of participating in the Plan of Arrangement (the "Arrangement") which closed December 20, 2012 involving Galway Metals, Galway Gold Inc., Galway Resources Ltd., AUX Acquisition 2 S.à.r.l. ("AUX") and AUX Canada Acquisition 2 Inc., formerly 2346407 Ontario Inc. ("AUX Canada"), a wholly owned subsidiary of AUX. Prior to the close of the Arrangement Agreement, Galway Metals did not carry on any active business.

Under the Arrangement, AUX Canada acquired all of the common shares of Galway Resources not already owned by AUX Canada and its affiliates and pursuant to the Arrangement, Galway Resources shareholders received for each Galway common share: cash consideration of Cdn\$2.05 per share, one common share of Galway Metals, and one common share in a new exploration and development company, Galway Gold Inc. Under the Arrangement, Galway Resources transferred to Galway Metals and Galway Metals holds indirectly as assets a 100% interest in Galway Resources' Victorio project, being a molybdenum-tungsten exploration project located in New Mexico (the "Victorio Project") and approximately US\$11.2 million in net working capital (US \$12 million when the transaction closed). Upon completion of the Arrangement, Galway's existing security holders own 100% of the Galway Metals shares outstanding, proportionate to their ownership of Galway at the time the Arrangement was completed.

The Arrangement was completed by way of statutory Plan of Arrangement under the Business Corporations Act (Ontario). The Arrangement was approved by Galway Resources' shareholders and

Galway Metals Inc.
Management's Discussion and Analysis
For the Three and Nine Months Ended September 30, 2014
Dated: November 26, 2014

warrant holders at a special meeting held on December 17, 2012. On January 4, 2013, the Company's common shares commenced trading on the TSX Venture Exchange under the symbol "GWM".

On September 10, 2013, Galway Metals held a special meeting of shareholders. At the Meeting, 98.22% of shareholders who attended in person or by proxy approved the consolidation of Galway's issued and outstanding shares on the basis of three (3) pre-consolidation shares for one (1) post-consolidation shares. Following the consolidation, Galway had 49,895,248 issued and outstanding shares. There was no change to Galway's name or trading symbol.

On January 31, 2014, the Company announced the approval and adoption by its board of directors (the "Board") of amendments to its by-laws to include advance notice provisions (the "Advance Notice Provision"), the purpose of which is to require advance notice to be provided to the Company in circumstances where nominations of persons for election to the Board are made by shareholders of the Company (the "Shareholders") other than pursuant to: (i) a requisition of a meeting of Shareholders made pursuant to the provisions of the Business Corporations Act (New Brunswick) (the "Act"); or (ii) a Shareholder proposal made pursuant to the provisions of the Act.

The purpose of the Advance Notice Provision is to provide Shareholders, directors and management of the Company with a clear framework for nominating directors. Among other things, the Advance Notice Provision fixes a deadline by which Shareholders must submit nominations to the Company prior to any annual or special meeting of the Shareholders and sets forth the minimum information that a Shareholder must include in the notice to the Company for the notice to be in proper written form.

In the case of an annual meeting of Shareholders, notice to the Company must be made not less than 30 days and no more than 65 days prior to the date of the annual meeting, provided, however, in the event that the annual meeting is to be held on a date that is less than 50 days after the date on which the first public announcement of the date of the annual meeting was made, notice may be made not later than the close of business on the 10th day following such public announcement.

In the case of a special meeting of Shareholders (which is not also an annual meeting), notice to the Company must be made not later than the close of business on the 15th day following the day on which the first public announcement of the date of the special meeting was made.

The Advance Notice Provision was approved by Shareholders at the annual meeting held on March 17, 2014.

On April 16, 2014, the Company announced that it had completed a non-brokered private placement financing (the "Financing"). The Financing consisted of the sale of 6,600,000 units (each, a "Unit") at a price of \$0.10 per Unit, with each Unit consisting of one common share of the Company (each, a "Share") and one-half of one Share purchase warrant (each whole such warrant, a "Warrant"), each Warrant entitling the holder to acquire one additional Share until April 16, 2017 at a price of \$0.15 per Share. 4,150,000 of the 6,600,000 Units were acquired by the CEO of the Company and 250,000 units were acquired by a director of the Company. The financing was approved by all of the non-interested directors of the Company and was exempt from the valuation and minority approval requirements in Multilateral Instrument 61-101 - Protection of Minority Security Holders in Special Transactions on the basis of certain exemptions available thereunder. The Financing was also approved by the TSX Venture Exchange. All securities issued pursuant to the Financing are subject to a statutory hold period of four months.

On May 20, 2014, the Company announced that it had been notified that a shareholder of the Company submitted a request for a hearing review by the British Columbia Securities Commission (the "BCSC") of the decision (the "Decision") of the TSX Venture Exchange to approve the Financing. The shareholder

requested that the BCSC issue an order (i) setting aside the Decision and (ii) issuing a cease trade order in respect of the Units (and underlying securities) issued in the Financing until the Financing has effectively been unwound. All subscribers to the Financing have been informed of the appeal. On August 21, 2014 the BCSC concluded its hearing and review of the matters noted above, and the shareholder's Application to reverse the Exchange's Decision approving the Financing was dismissed.

On November 5, 2014, the Company announced that Larry Strauss and Michael Sutton agreed to join its Board of Directors. Messrs. Strauss and Sutton have extensive expertise in the gold industry and have been acting as technical advisors to the Company, assisting in identifying and assessing precious metal opportunities, primarily in the Americas.

The Company also announced that Mr. Robert Schafer resigned as a member of the Board of Directors. Mr. Schafer has been a valuable member of the Board, but his many business interests have required him to step down. Mr. Schafer will, however, continue to act as an advisor to the Company, and management looks forward to his ongoing contributions, guidance and advice. Galway would like to thank Mr. Schafer for his prior and continued service to the Company.

Further information about the Company and its operations can be obtained from www.galwaymetalsinc.com and www.sedar.com.

Discussion of Operations

The Victorio Project is an advanced-stage exploration property secured through an option agreement that when executed gave Galway Metals 100% ownership. The property has excellent infrastructure such as access by paved road to within a few miles of the site, a nearby railway and a gas pipeline. Victorio is located approximately 20 miles west of Deming, New Mexico. The Company has done three 43-101 Resource estimates, the latest of which can be seen below. After the second resource estimate was released, a positive scoping study was carried out by SRK Consulting. The depressed nature of the junior mining capital markets, combined with sustained low molybdenum pricing, has prompted management to continue to look for a joint venture partner to advance the project while also investigating acquisitions of other promising mineral properties. In the mean time, the Company is conserving capital until general market conditions improve and the carrying value of the Victorio Project has been written down to \$Nil. See below under "Mineral Property Interests."

In 2008, Galway Resources Ltd completed a 12-hole, 25,000 foot, phase 2 infill drilling program. The purpose of the infill drilling program was to upgrade the resources with the next step being a pre-feasibility study. The first phase of drilling included 6 holes totaling 13,000 feet. This project was acquired in June 2006, and was worked on extensively by Gulf Minerals in the early eighties as they drilled 165,000 feet.

Galway Metals Inc.
Management's Discussion and Analysis
For the Three and Nine Months Ended September 30, 2014
Dated: November 26, 2014

The current Technical Report on Victorio's Resources by Dr. H. Peter Knudsen and Peter H. Hahn dated November 15, 2012, was derived from 217,000 feet of drilling using an \$8.00 Tungsten and \$15.00 per pound molybdenum long term price.

Category	Cutoff/ Ton	Tons	Mo %	Tungsten %	Contained Metal (pounds)	
					Molybdenum	Tungsten
Measured	\$25	37,737,913	0.10	0.08	71,702,035	61,890,177
Indicated	\$25	39,499,463	0.08	0.09	64,779,119	72,679,012
M+I	\$25	77,237,376	0.09	0.09	136,481,154	134,569,189
Inferred	\$25	77,222,232	0.07	0.09	114,288,903	143,633,352
Measured	\$35	20,275,366	0.12	0.11	47,444,356	42,983,776
Indicated	\$35	19,125,184	0.10	0.12	39,397,879	45,517,938
M+I	\$35	39,400,550	0.11	0.11	86,842,235	88,501,714
Inferred	\$35	34,728,550	0.10	0.11	66,678,816	78,486,523

As part of the Arrangement, Galway's 100% interest in the Victorio Project was transferred to Galway Metals and Galway Metals has assumed two Galway agreements with regard to the Victorio Mountain Molybdenum - Tungsten Project in New Mexico. Galway Metals is committed to continue the payment obligations under these agreements, as renegotiated to reflect the fact that Galway common shares will no longer be issued as payment. The outstanding payment obligations under the original agreements are set out below:

In April 2014, the Company renegotiated the timing of its required cash and share payments for its Victorio property. Under the revised terms, the Company is obligated to make payments as follows:

- payment of \$100,000 (paid) on June 1, 2013 and 50,000 Galway Metals common shares (issued, and ascribed a fair value of \$1,948);
- payment of \$75,000 (paid) on June 1, 2014 and 50,000 Galway Metals common shares (issued on May 21, 2014, and ascribed a fair value of \$7,330);
- payment of \$75,000 on June 1, 2015;
- payment of \$75,000 on June 1, 2016;
- payment of \$75,000 on June 1, 2017; and
- payment of \$900,000 on June 1, 2018.

The property is subject to a net smelter royalty of 2%. In addition, Donegan Resources Inc. is entitled to receive a 1% net smelter royalty ("NSR") on any additional properties acquired within the vicinity of the Victorio Project. This NSR will be reduced to 0.5% royalty on any properties that are subject to an existing royalty in excess of 0.5%.

On June 1, 2006, Galway entered into an option agreement with Hallelujah Resources LLC, South Branch Resources LLC and MRP Geo Company LLC, collectively the "sellers" to acquire an undivided 100% right, title and interest in and to 51 additional mining claims of the Victorio Project. For purposes of the agreement, nine of the acquired claims were deemed to be primary claims, and forty two were deemed to be secondary claims.

Pursuant to the agreement, the Company is committed to make the following payments:

- issuing 200,000 shares upon the commencement of commercial production.

On completion of these payments, Galway Metals will own an undivided 100% right, interest and title in these Victorio Project claims, subject to a NSR of 1% on all primary mining claims excluding the primary mining claim VIC 41 (the "Primary Royalty"). The Company is entitled to purchase 100% of the Primary Royalty for \$500,000, payable as to 50% on completion of a bankable feasibility study and 50% no later than the end of the first full year of commercial production from the primary mining claims.

In addition, there is an NSR of 3% on all secondary mining claims including primary mining claim VIC 41 (the "Secondary Royalty"). Galway Metals is entitled to buy the Secondary Royalty down to 2% for \$1,500,000, payable as to 50% on completion of a bankable feasibility study and 50% no later than the end of the first full year of commercial production from the secondary mining claims.

Management has assessed the carrying value of the Victorio Project and determined there were indicators of impairment. Accordingly, effective as of the fourth quarter of 2013, an impairment charge of \$1,629,599 was recorded. The Company has estimated the recoverable amount based on a number of factors, including with reference to the Company's market capitalization and management's models and plans with respect to the Victorio Project. The aggregate impairment charge was recorded as impairment of non-current assets on the consolidated statement of comprehensive loss on the Company's audited consolidated financial statements for the year ended December 31, 2013.

In light of the current volatility of capital markets, the Company is evaluating the timing and extent of its exploration plans with respect to its resource properties, with an emphasis on the conservation of its liquid assets and the identification of opportunities to acquire other promising mineral properties.

Selected Quarterly Information

A summary of selected information for each of the quarters presented below is as follows:

For the Period Ended	Revenue (\$)	Net Earnings (Loss)		Total assets (\$)
		Total (\$)	Basic and diluted loss per share (\$)	
2014 – September 30	Nil	294,774	0.01	11,426,654
2014 – June 30	Nil	(668,053)	(0.01)	11,638,910
2014 – March 31	Nil	261,927	(0.00)	11,269,694
2013 – December 31	Nil	(1,872,522)	(0.00)	11,333,730
2013 – September 30	Nil	(512,637)	(0.00)	13,098,967
2013 – September 30	Nil	348,579	(0.00)	13,296,034
2013 – March 31	Nil	37,944	(0.00)	13,459,895
2012 – December 31	Nil	(107,645)	(0.00)	13,567,228

Three Months Ended September 30, 2014 vs Three Months Ended September 30, 2013

The Company reported net income of \$294,774 (three months ended September 30, 2013 – net loss of \$512,637), primarily attributable to foreign exchange gains of \$509,256 (three months ended September 30, 2013 – foreign exchange loss of \$293,022), partially offset by administrative expenses of \$207,102 (three months ended September 30, 2013 - \$151,155).

Administrative Expenses

The three months ended September 30, 2014 saw administrative expenses of \$207,102 (three months ended September 30, 2013 - \$151,155), consisting primarily of:

- salaries and benefits of \$89,943 (three months ended September 30, 2013 – \$43,069), comprised of senior management and administration remuneration.
- general office and consumable expenses of \$20,603, (three months ended September 30, 2013 – a recovery of \$22,359)
- executive travel expenses of \$5,383 (three months ended September 30, 2013 – \$16,754)
- professional fees of \$71,872 (three months ended September 30, 2013 – \$42,078) consisting of general legal expenses and costs associated with the favourable British Columbia Securities Commission Hearing, financial reporting, and consulting costs incurred.
- public company costs of \$6,263 (three months ended September 30, 2013 – \$22,936) consisting of filing fees, transfer agent fees, investor relations costs, and shareholder information expenses

Galway Metals Inc.
Management's Discussion and Analysis
For the Three and Nine Months Ended September 30, 2014
Dated: November 26, 2014

- insurance expense of \$19,038 (three months ended September 30, 2013 – \$3,959) representing primarily the quarterly portion of the Company's directors and officers insurance.

(Loss) Gain on Foreign Exchange

Gain on foreign exchange of \$509,256 (three months ended, September 30, 2013 a loss of - \$293,022) resulting from US dollar cash held in the Company's Canadian entity, which maintains a functional currency of the Canadian dollar. This is substantially offset by a corresponding translation adjustment in other comprehensive loss upon translation and consolidation into the Company's US dollar consolidated financial statements. Movement in the relative US/CAD exchange rates over the comparative three months ended September 30, 2013 is the primary driver for the period over period variance.

Exploration Expenses

The three months ended September 30, 2014 saw exploration expenses of \$nil (three months ended September 30, 2013 - \$73,549), consisting primarily of:

- Geological expenses of \$nil (three months ended September 30, 2013 - \$65,429)
- General expenses of \$nil (three months ended September 30, 2013 - \$8,120)

Nine Months Ended September 30, 2014 vs Nine Months Ended September 30, 2013

The Company reported a net loss of \$111,352, representing expenses of \$672,952 offset by foreign exchange gains of \$561,600, for the nine months ended September 30, 2014 (Nine months ended September 30, 2013 – expenses of \$527,620 offset by foreign exchange gains of \$401,506).

Administrative Expenses

The nine months ended September 30, 2014 saw administrative expenses of \$565,772 (Nine months ended September 30, 2013 - \$409,211), consisting primarily of:

- salaries and benefits of \$206,787 (nine months ended September 30, 2013 - \$162,857), comprised of senior management.
- general office and consumable expenses of \$64,315 (nine months ended September 30, 2013 - \$94,327),
- professional fees of \$180,147 (nine months ended September 30, 2013 - \$68,916) consisting of general legal expenses and costs associated with the favourable British Columbia Securities Commission Hearing, financial reporting, and consulting costs incurred.
- executive travel expenses of \$28,545 (nine months ended September 30, 2013 – \$16,754)
- public company costs of \$56,150 (nine months ended September 30, 2013 - \$54,439), consisting of filing fees, transfer agent fees, investor relations costs, and shareholder information expenses
- insurance expense of \$29,828 (nine months ended September 30, 2013 - \$11,918), representing the quarterly portion of the Company's directors and officers insurance.

Gain on Foreign Exchange

Gains on foreign exchange of \$561,600 (nine months ended, September 30, 2013 a gain of - \$401,506) resulting from US dollar cash held in the Company's Canadian entity, which maintains a functional currency of the Canadian dollar. This is substantially offset by a corresponding translation adjustment in other comprehensive loss upon translation and consolidation into the Company's US dollar consolidated financial statements. Movement in the relative US/CAD exchange rates over the comparative three months ended September 30, 2013 is the primary driver for the period over period variance.

Galway Metals Inc.
Management's Discussion and Analysis
For the Three and Nine Months Ended September 30, 2014
Dated: November 26, 2014

Expenditures through the third quarter of fiscal 2013, continued to relate to the set-up of corporate infrastructure and the meeting initial statutory reporting requirements, subsequent to the Company's commencement of operations on December 20, 2012. During the nine months ended September 30, 2013, the Company experienced administrative and general expenses in conjunction with the close of the Arrangement described on page 2, and initial costs of administering a new reporting issuer.

Exploration Expenses

The nine months ended September 30, 2014 saw exploration expenses of \$503 (nine months ended September 30, 2013 - \$129,337), consisting primarily of:

- Geological expenses of \$nil (nine months ended September 30, 2013 - \$94,363)
- Miscellaneous exploration costs of \$503 (nine months ended September 30, 2013 - \$28,968), including camp costs, administrative support and ancillary consumable items
- Other costs of \$nil (nine months ended September 30, 2013 - \$2,161)
- Assaying costs of \$nil (nine months ended September 30, 2013 - \$3,845)

Liquidity and Capital Resources

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. The Company's liquidity and operating results may be adversely affected if the Company's access to the capital market is hindered, whether as a result of a downturn in stock market conditions generally or as a result of conditions specific to the Company. As at September 30, 2014, the Company had a cash balance of \$11,276,245 (December 31, 2013 - \$11,064,042) to settle current liabilities of \$131,485 (December 31, 2013 - \$95,319). The Company regularly evaluates its cash position to ensure preservation and security of capital as well as maintenance of liquidity. As the Company does not generate revenue, managing liquidity risk is dependent upon the ability to secure additional financing.

On April 16, 2014, the Company closed a non-brokered private placement financing (the "Financing"). The Financing consisted of the sale of 6,600,000 units (each, a "Unit") at a price of \$0.10 per Unit, with each Unit consisting of one common share of the Company (each, a "Share") and one-half of one Share purchase warrant (each whole such warrant, a "Warrant"), each Warrant entitling the holder to acquire one additional Share until April 16, 2017 at a price of \$0.15 per Share. 4,150,000 of the 6,600,000 Units were acquired by the CEO of the Company and 250,000 units were acquired by a director of the Company. The financing was approved by all of the non-interested directors of the Company and was exempt from the valuation and minority approval requirements in Multilateral Instrument 61-101 - Protection of Minority Security Holders in Special Transactions on the basis of certain exemptions available thereunder. The Financing was also approved by the TSX Venture Exchange. All securities issued pursuant to the Financing are subject to a statutory hold period of four months.

The 3,300,000 warrants issued in conjunction with the Financing were issued with an exercise price of \$0.15, expiring in three years and vesting immediately upon grant. A fair value of \$298,909 was estimated using the Black-Scholes pricing model with the following assumptions: dividend yield 0%, expected volatility 124.06%, a risk free interest rate of 1.18%, and an expected maturity of 3 years.

Most of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

Galway Metals Inc.
Management's Discussion and Analysis
For the Three and Nine Months Ended September 30, 2014
Dated: November 26, 2014

Given the state of financial markets, the Company is re-evaluating its exploration programs, with a near term emphasis on conservation of the Company's liquidity and, where possible on terms favourable to the Company, acquisitions of other promising mineral properties. In keeping with this, scheduled property payments have been renegotiated on more favourable terms and now take place over a longer period. In light of the legal fees required to favorably conclude the British Columbia Securities Commission Hearing, the Company expects to have incurred approximately \$750,000 in general administration expenditures over the twelve months ending December 31, 2014.

Off-Balance Sheet Arrangements

As of the date of this filing, the Company does not have any off-balance sheet arrangements that have, or are reasonably likely to have, a current or future effect on the results of operations or financial condition of the Company including, without limitation, such considerations as liquidity and capital resources that have not previously been discussed.

Proposed Transactions

As of the date of this document, there are no reportable proposed transactions.

Related Party Transactions

During the nine months ended September 30, 2014, the Company received \$150,000 (nine months ended September 30, 2013 - \$475,000) from Galway Gold Inc., a company sharing common officers and directors, for the purposes of funding certain administrative and operational activities paid by the Company on the Galway Gold's behalf. As at September 30, 2014, a receivable of \$nil (December 31, 2013 - \$108,789) remained, representing net expenses incurred on Galway Gold's behalf in excess of reimbursements received. During the period, all advances were repaid in full.

Remuneration of directors and officers included in administrative expenses are as follows:

	Three Months Ended September 30, 2014 \$	Three Months Ended September 30, 2013 \$	Nine Months Ended September 30, 2014 \$	Nine Months Ended September 30, 2013 \$
Remuneration paid for CEO services	50,000	50,000	100,000	100,000
Remuneration paid for CFO services	4,132	4,500	12,335	13,500
Stock-based compensation – directors and officers	nil	nil	nil	nil

During the three and nine months ended September 30, 2014, the Company expensed \$24,675 and \$50,818 respectively (three and nine months ended September 30, 2013 - \$25,967 and \$50,835, respectively) to Marrelli Support Services Inc. ("Marrelli Support") and DSA Corporate Services Inc. (the "DSA"), together known as the "Marrelli Group" for:

- Robert D.B. Suttie, vice president of Marrelli Support, to act as Chief Financial Officer ("CFO") of the Company;
- Bookkeeping and office support services;
- Regulatory filing services

- Corporate secretarial services

The Marrelli Group is also reimbursed for out of pocket expenses.

As of September 30, 2014, the Marrelli Group was owed \$10,524 (December 31, 2013 - \$15,902). These amounts are included in accounts payable and accrued liabilities.

Risk Factors

An investment in the securities of the Company is highly speculative and involves numerous and significant risks. Such investment should be undertaken only by investors whose financial resources are sufficient to enable them to assume these risks and who have no need for immediate liquidity in their investment. Prospective investors should carefully consider the risk factors that have affected, and which in the future are reasonably expected to affect, the Company and its financial position.

(a) Property Risk

The Company's significant mineral property is the Victorio Mountain property (the "Project"). Unless the Company acquires or develops additional significant properties, the Company will be solely dependent upon the Project. If no additional mineral properties are acquired by the Company, any adverse development affecting the Project would have a material adverse effect on the Company's financial condition and results of operations. Management has assessed the carrying value of the Project and it was determined there were indicators of impairment. Accordingly, an impairment charge of \$1,629,599 was recorded effective as of the fourth quarter of 2013. The Company estimated the recoverable amount based on a number of factors, including with reference to the Company's market capitalization and management's models and plans with respect to the project.

(b) Financial Risk

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk, market risk (including interest rate, foreign exchange rate, and commodity and equity price risk). Risk management is carried out by the Company's management team with guidance from the Audit Committee under policies approved by the Board of Directors. The Board of Directors also provides regular guidance for overall risk management.

Credit Risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash. The Company has no significant concentration of credit risk arising from operations. Cash consists of cash at banks and on hand. The cash has been invested and held with reputable financial institutions, from which management believes the risk of loss to be remote.

Liquidity Risk

Liquidity risk refers to the risk that the Company will not be able to meet its financial obligations as they become due, or can only do so at excessive cost. The Company's liquidity and operating results may be adversely affected if the Company's access to the capital market is hindered, whether as a result of a downturn in stock market conditions generally or as a result of conditions specific to the Company. As at September 30, 2014, the Company had a cash balance of \$11,276,245 (December 31, 2013 - \$11,064,042) to settle current liabilities of \$131,485, (December 31, 2013 - \$95,319). The Company regularly evaluates its cash position to ensure preservation and security of capital as well as maintenance

Galway Metals Inc.
Management's Discussion and Analysis
For the Three and Nine Months Ended September 30, 2014
Dated: November 26, 2014

of liquidity. As the Company does not generate revenue, managing liquidity risk is dependent upon the ability to secure additional financing.

Most of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

Market Risks

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices.

(i) Interest Rate Risk

The Company has cash balances and no interest-bearing debt. The Company regularly monitors its cash management policy. As a result, Galway Metals is not subject to significant interest rate risk.

(ii) Foreign Exchange Risk

The Company's functional currency is the United States dollar and it transacts major purchases in United States dollars and Canadian dollars. To fund exploration expenses, it maintains United States dollar and Canadian dollar bank accounts denominated bank accounts containing sufficient funds to support monthly forecasted cash outflows. Management believes the foreign exchange risk derived from currency conversions is minimal, and therefore does not hedge its foreign exchange risk.

Sensitivity Analysis

Based on management's knowledge and experience of the financial markets, the Company believes the following movements are reasonably possible for the period ended September 30, 2014:

- (i) Cash is subject to floating interest rates. Sensitivity to a plus or minus one percentage point change in interest rates would not have a material impact on reported net loss for the three and nine months ended September 30, 2014.
- (ii) The Company is exposed to foreign currency risk on fluctuations of financial instruments related to cash, prepaid expenses and deposits and accounts payable denominated in Canadian dollars. Sensitivity to a plus or minus one percentage point change in exchange rates would impact the reported net income (loss) by approximately \$130,000 for the nine months ended September 30, 2014.
- (iii) Commodity price risk could adversely affect the Company. In particular, the Company's future profitability and viability of development depends upon the world market price of precious and base metals. These metal prices have fluctuated significantly in recent years. There is no assurance that, even if commercial quantities of these metals may be produced from the Company's properties in the future, a profitable market will exist for them.

As of September 30, 2014, the Company was in the exploration and development stage and did not have any production at any of its mineral properties. As a result, commodity price risk may affect the completion of future equity transactions such as equity offerings and the

exercise of stock options and warrants. This may also affect the Company's liquidity and its ability to meet its ongoing obligations.

Litigation Risk

Litigation risk refers to the risk that the Company may become involved in litigation or administrative proceedings from time to time, the outcomes of which may be uncertain. An unfavorable judgement, ruling or order may adversely affect the Company's business and financial condition, See also "Subsequent Events".

Current Global Financial Conditions and Trends

Securities of mining and mineral exploration companies, have experienced substantial volatility in the past, often based on factors unrelated to the financial performance or prospects of the companies involved. These factors include macroeconomic developments globally, and market perceptions of the attractiveness of particular industries. The price of the securities of companies is also significantly affected by short-term changes in commodity prices, base and precious metal prices or other mineral prices, currency exchange fluctuation and the political environment in the countries in which the Company does business. As of September 30, 2014, the global economy continues to be in a period of significant economic and political volatility, in large part due to US, European and Middle East economic concerns which have impacted global economic growth.

Dependence on Key Employees

The Company's business and operations are dependent on retaining the services of a small number of key employees. The success of the Company is, and will continue to be, to a significant extent, dependent on the expertise and experience of these employees. The loss of one or more of these employees could have a materially adverse effect on the Company. The Company does not maintain insurance on any of its key employees.

New Accounting Standards and Interpretations

IFRIC 21 Levies sets out the accounting for an obligation to pay a levy that is not income tax. The interpretation addresses what the obligating event is that gives rise to pay a levy and when should a liability be recognized. The Company has not yet assessed the impact on its financial statements. On January 1, 2014, the Company adopted this pronouncement and there was no material impact upon the Company's unaudited condensed interim consolidated financial statements.

Future Accounting Pronouncements

In November 2009, the IASB issued, and subsequently revised in October 2010, IFRS 9 as a first phase in its ongoing project to replace IAS 39. IFRS 9, which is to be applied retrospectively, will be effective for annual periods beginning on or after January 1, 2018.

IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. The Company is in the process of assessing the impact of this announcement.

There are no other relevant IFRSs or IFRIC interpretations that are not yet effective that would be expected to have a material impact on the Company.

Financial Instruments

Financial Assets

All financial assets are recognized and derecognized on the trade date where the purchase or sale of a financial asset is under a contract whose terms require delivery of the financial asset within the time frame established by the market concerned, and are initially measured at fair value, plus transaction costs.

Financial assets are classified as 'loans and receivables'. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition. Loans and receivables are subsequently measured at amortized cost using the effective interest method, with interest recognized on an effective yield basis.

The effective interest method is a method of calculating the amortized cost of a financial asset and of allocating interest, when applicable, over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial asset or to the net carrying amount on initial recognition.

Impairment of Financial Assets

Financial assets are assessed for indicators of impairment at the end of each reporting period. Financial assets are impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial assets, the estimated future cash flows of the investments have been negatively impacted. Evidence of impairment could include: significant financial difficulty of the issuer or counterparty; or default or delinquency in interest or principal payments; or the likelihood that the borrower will enter bankruptcy or financial reorganization.

Financial Liabilities

Financial liabilities are classified as 'other financial liabilities'.

Other Financial Liabilities

Other financial liabilities including borrowings are initially measured at fair value, net of transaction costs. Other financial liabilities are subsequently measured at amortized cost using the effective interest method, with interest recognized on an effective yield basis.

The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest costs over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability or to the net carrying amount on initial recognition.

De-recognition of Financial Liabilities

The Company de-recognizes financial liabilities when the obligations are discharged, cancelled or expire. The Company's financial instruments consist of the following:

Galway Metals Inc.
Management's Discussion and Analysis
For the Three and Nine Months Ended September 30, 2014
Dated: November 26, 2014

Financial Assets:	Classification:
Cash	Loans and receivables
Prepays and deposits	Loans and receivables
Financial Liabilities:	Classification:
Accounts payable and other liabilities	Other financial liabilities

The carrying amount of financial assets is reduced by any impairment loss directly for all financial assets with the exception of accounts or loans receivable, where the carrying amount is reduced through the use of an allowance account. When an accounts or loan receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in profit or loss.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognized.

Financial Instruments Recorded at Fair Value

Financial instruments recorded at fair value on the consolidated statements of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels: Level 1 - valuation based on unadjusted quoted prices in active markets for identical assets or liabilities; Level 2 - valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly [i.e. as prices] or indirectly [i.e. derived from prices]; and Level 3 - valuation techniques using inputs for the asset or liability that are not based on observable market data [unobservable inputs]. As of December 31, 2013 and September 30, 2014 cash was classified as Level 1 on the consolidated statements of financial position.

Critical Accounting Estimates

Significant assumptions about the future that management has made that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

Stock-Based Compensation

Management is required to make certain estimates when determining the fair value of stock options awards, and the number of awards that are expected to vest. These estimates affect the amount recognized as stock-based compensation in the statements of loss based on estimates of forfeiture and expected lives of the underlying stock options. During the nine months ended September 30, 2014, the Company did not issue stock options and had therefore had therefore not recognized any stock based compensation expense, aside from recognition of vested portions of prior grants.

Critical Accounting Judgments

Income Taxes and Recovery of Deferred Tax Assets

The measurement of income taxes payable and deferred income tax assets and liabilities requires management to make judgments in the interpretation and application of the relevant tax laws. The actual amount of income taxes only becomes final upon filing and acceptance of the tax return by the relevant authorities, which occurs subsequent to the issuance of the financial statements. Deferred tax assets require management to assess the likelihood that Galway Metals will generate taxable income in future periods in order to utilize recognized deferred tax assets.

Restoration, Rehabilitation and Environmental Obligations

Management's assumption of no material restoration, rehabilitation and environmental exposure, is based on the facts and circumstances that existed in the current and prior years.

Impairment of Resource Property Costs

Management reviews the carrying values of exploration and evaluation assets whenever events or changes in circumstances indicate that their carrying values may not be recoverable. This analysis is performed by CGU which is defined as the Company resource properties. The recoverable amount of cash-generating units for an exploration stage company requires various subjective assumptions. These assumptions may change significantly over time when new information becomes available and may cause original estimates to change.

Subsequent Events

On November 5, 2014, the Company announced that Larry Strauss and Michael Sutton agreed to join its Board of Directors. Messrs. Strauss and Sutton have extensive expertise in the gold industry and have been acting as technical advisors to the Company, assisting in identifying and assessing precious metal opportunities, primarily in the Americas.

The Company also announced that Mr. Robert Schafer resigned as a member of the Board of Directors. Mr. Schafer has been a valuable member of the Board, but his many business interests have required him to step down. Mr. Schafer will, however, continue to act as an advisor to the Company, and management looks forward to his ongoing contributions, guidance and advice. Galway would like to thank Mr. Schafer for his prior and continued service to the Company.

Capital Management

The Company manages its capital with the following objectives:

- to ensure sufficient financial flexibility to achieve the ongoing business objectives including funding of future growth opportunities, and pursuit of accretive acquisitions; and
- to maximize shareholder return through enhancing the share value.

The Company monitors its capital structure and makes adjustments according to market conditions in an effort to meet its objectives given the current outlook of the business and industry in general. The Company may manage its capital structure by issuing new shares, repurchasing outstanding shares, adjusting capital spending, or disposing of assets. The capital structure is reviewed by management and the Board of Directors on an ongoing basis.

Galway Metals Inc.
Management's Discussion and Analysis
For the Three and Nine Months Ended September 30, 2014
Dated: November 26, 2014

The Company considers its capital to be equity, comprising share capital, accumulated other comprehensive income, and deficit, which at September 30, 2014 totaled \$11,295,169 (December 31, 2013 - \$11,238,411). The Company manages capital through its financial and operational forecasting processes. The Company reviews its working capital and forecasts its future cash flows based on operating expenditures, and other investing and financing activities. The forecast is updated based on activities related to its mineral properties. Information is provided to the Board of Directors of the Company. The Company's capital management objectives, policies and processes have remained unchanged during the nine months ended September 30, 2014. The Company is not subject to externally imposed capital requirements.

Additional Disclosure for Venture Issuers without Significant Revenue

Administrative expenses for the nine months ended September 30, 2014 and 2013 are comprised of the following:

Nine Months Ended September 30,	2014	2013
	(\$)	(\$)
Salaries and benefits	206,787	162,857
Travel expense	28,545	16,754
Office and general	64,315	94,327
Public company costs	56,150	54,439
Insurance	29,828	11,918
Professional fees	180,147	68,916
	565,772	409,211

Disclosure of Outstanding Share Data

As at the date of this document, the Company had 57,195,248 issued and outstanding shares, 4,175,000 outstanding stock options, exercisable at \$0.10 until December 23, 2023, and 3,300,000 warrants, exercisable at \$0.15 until April 16, 2017.

Cautionary Note Regarding Forward-Looking Statements

Certain statements contained in this MD&A constitute forward-looking statements. Such forward-looking statements involve a number of known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements.
