VG = visible gold; No upper cutoff grade was applied; 0.42 g/t Au was used for the bottom cut-off; True widths are unknown where not specified;

\* Intersection used 0.42 g/t Au for the bottom cut-off as per pit constrained resources but is at likely too much depth;

Pending results, if no longer there, have come back with no significant values. "No sampling" = Will be sampled with infill drilling
