

SOUTH ZONE LONGITUDINAL SECTION

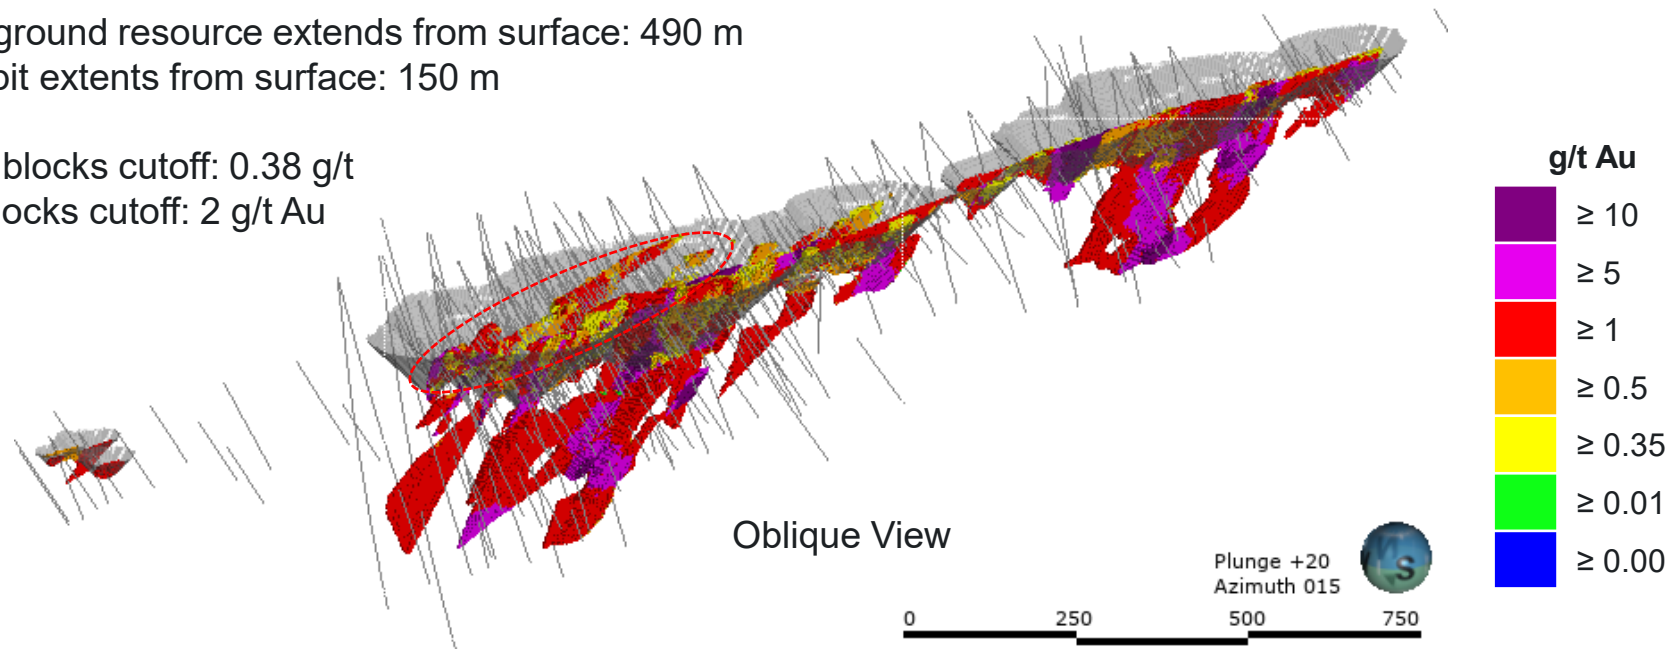

SOUTH ZONE RESOURCE
 89% INDICATED
 20% INFERRED
 PIT CONSTRAINED

Ind: 3.5MT @ 2.99 g/t Au
 = 332,000 oz + Sb

Inf: 2.5MT @ 4.03 g/t Au
 = 325,000 oz + Sb

- Depth of underground resource extends from surface: 490 m
- Depth of open pit extents from surface: 150 m
- Pit constrained blocks cutoff: 0.38 g/t
- Underground blocks cutoff: 2 g/t Au

- Excellent potential for high grade starter pits
- 2 km long and open in all directions; drilled to 520m
- Open to expand high grade gold shoots along west plunge; zone dips steeply to the north
- Needs more drilling – limited drilling in 4 years
- Valuable antimony by-product credits
